1. Shut off the power at the fuse box or circuit breaker. If necessary, remove the old fixture, including the mounting hardware.
2. Carefully unpack your new fixture, lay out all parts on a clear area. Be careful not to lose any small parts necessary for installation.
3. Thread two mounting screws (B) into the mounting plate (C) spaced the same distance apart as the holes in the fixture back plate. (You can adjust the length of the screws if necessary.)
4. Attach mounting plate (C) to outlet box (A) (not included) with outlet box screws (D). (Size: #8-32*0.78"L). The side of the mounting plate (C) marked "GND" must face out.

CONNECTING THE WIRES (Fig. 2)

5. Connect the electrical wires as shown in Fig. 2. Making sure that all wire connectors are secured. If your outlet box (A) has a ground wire (green or bare copper), connect fixture's ground wire to it. Otherwise, connect fixture's ground wire directly to the mounting plate (C) using green screw provided.

COMPLETING THE INSTALLATION (Fig. 1)

6. Align back plate (G) onto mounting plate (C) and secure with two ball nuts (F) & washers (E).
7. Align metal shade (H) on the socket and secure with socket ring (I).
8. Install (1) one medium base bulb (J) up to 100 watts or CFL or LED equivalent (not included) in accordance with the fixture specification. **(DO NOT EXCEED THE SPECIFIED WATTAGE!) (NE PAS DEPASSER LA PUISSANCE NOMINALE MAXIMALE!).**
9. To prevent moisture from entering the outlet box (A) and causing a short, use clear caulking (i.e. Indoor/Outdoor Silicone Sealant) to outline the outside of fixture back plate where it meets the wall leaving a space at bottom to allow moisture a means to escape. (Fig. 3)

Your installation is now complete. Return power to the outlet box and test the fixture.

Note: Illustration (Fig. 1) on this manual is for installation purposes only. It may or may not be identical to the fixture purchased.
